## (54) SCENE SUPERVISORY SYSTEM

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide a scene supervisory system that can provide a displayable scene image to a mobile unit in a proper mode at all times regardless of the type of the mobile unit.

**SOLUTION:** An image processing center 14 receives and stores an image acquired by an image acquisition means 19 via a private communication network 15 or the Internet 10 and applies the conversion processing to the image so as to have a depth of colors, the size and the direction of the image corresponding to the type of the mobile unit 11. The image processing center 14 opens the image to public via the Internet 10 when sensing a change in the scene on the basis of the images sequentially stored and receiving a request from the mobile unit.
